**POWER EQUIPMENT**

**CATALOGUE**

**Power Equipment Catalogue is aimed at helping you find a partner in Russia. It is the only source of reliable information related to the Russian and CIS gas turbine and power equipment market and the companies active on it.**

**The chapters are traditional for the annual Catalogue but the information is revised every year.**

**The company list contains the contact information and the short description of all companies related in any way to the industry. When you come across a name you don't know it is easy enough to find it in the alphabetically arranged list and get the initial information about the company you need.**

**Powerplant and gas compression packages commissioned in Russia and the CIS countries**

**This chapter helps you see the market trends and tendencies, learn about the market players.**

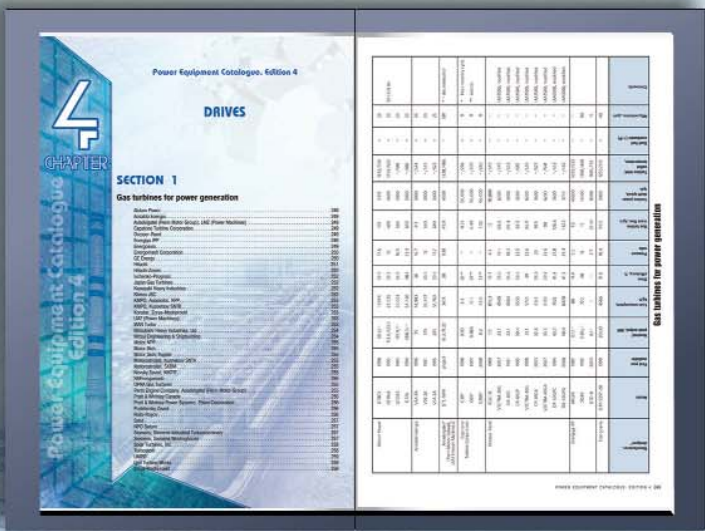

**Tables of cogeneration and combined cycle powerplants operating in Russia and the CIS. They include the information on the main parameters, location, year of commissioning, general designer and contractor, including the name, parameters and suppliers of the basic equipment.**

Technical description of 27 combined cycle powerplants contains the complete detailed information and parameters of all powerplants operating and constructed in Russia and the CIS provided by the equipment producers.

Technical parameters of gas turbines and gas turbine powerplants of various cycles as well as gas compression packages and fuel gas boosters.

If you think of starting or extending business in Russia and the CIS the Catalogue can help you.

Learn more about the market and its players.

Information is essential for business. Don't miss out on the opportunity to have it at hand.

The price of the Catalogue is € 110 (airmail worldwide delivery is included).

# POWER EQUIPMENT CATALOGUE

**SPECIALISED INFORMATION AND ANALYTICAL EDITION**

*If you are looking for a business partner or equipment supplier, if you are an engineer or a professor, if you teach about gas turbines or study them then we publish it for you.*

**NOW IT IS DIGITAL!  
GET IT INSTANTLY AND RIGHT TO YOUR DESK TOP**

*Since 2007 Gas Turbo Technology magazine is published completely in English providing the information about Russia and CIS gas turbine market at first hand.*

**THE MAGAZINE COVERS:**

- efficient ways of power generation
- advanced projects
- environmental upgrading of equipment
- implementation and operation of industrial gas turbines in power industry of Russia and abroad
- new developments, monitoring of new construction
- market news and trends

*The magazines are distributed by subscription and to all visitors of international events such as ASME Turbo Expo, POWER-GEN International, POWER-GEN Europe, Turbomachinery Symposium, Russia Power, Neftegaz, Turbine Forum, GTUS, etc.*

*We offer you to subscribe to Gas Turbo Technology magazine (ten digital issues a year, the subscription is free for specialists) at [www.gtt.ru/en](http://www.gtt.ru/en)*

*Get the reliable information about Russia and CIS gas turbine developments and market you can't find anywhere else!*

***Use your chance now!***
